Mr. Tom Biamonte  
Shelby Crushed Stone, Inc.  
10830 Blair Road  
Medina, NY 14103

**Change in Aggregate Source Status**

**Name: Shelby Crushed Stone, Inc.**

**Location: Shelby Center, NY**

**Source No. 4-16R**

**Aggregate Approved for Item 703-02**

**Note: Aggregate from this source is approved  
only for NYSDOT item 703-02**

Dear Mr. Biamonte:

Aggregate from the operating location noted above is approved for item 703-02, coarse aggregate. A stockpile rejection letter was sent on 5/27/2016 stating requirements needing to be addressed, regarding the restriction of use in portland cement concrete. The requirements have been met and the restriction removed. Aggregate sources which satisfy all applicable requirements of Materials Method 29 (MM29), issued July 2007, appear on the Approved List of Sources of Fine and Coarse Aggregates. The Approved List is available on the Internet at [www.dot.ny.gov](http://www.dot.ny.gov) by clicking on "Approved Materials List" at the bottom of the home page. The passing test number 16AR73 will appear on the next update of the Approved List.

Approval status is maintained by testing every 2 years and adherence to the requirements of MM29. Approval status may be modified if it is determined that conditions have changed. The Regional Materials Engineer may be consulted for current data concerning this or any source.

Any questions regarding these matters may be directed to the Materials Bureau, Engineering Geology Section staff at (518) 457-1038.

Sincerely,

Thomas Festa  
Engineering Geology
